## EXPERIENCE

---

### MetEngine

Feb. 2025 – Jun. 2026

#### Co-Founder & CTO

- Led the backend end-to-end, building high-throughput data-processing pipelines and real-time analytics on Solana.
- Built zero-slot latency automated copy-LPing experience that drove **\$4.3M+** in yield for **8.5K+ users** and scaled total volume to **\$114M+**
- Built x402 and MPP-based data APIs for Polymarket, Hyperliquid, and market making, serving **6,000+ transactions** on Solana
- Shipped a Chrome extension (**2,500+ peak downloads**) delivering richer analytics for Polymarket, Hyperliquid, and Solana market making

### WalletConnect

Nov. 2024 – May 2025

#### DevRel Engineer (WalletKit)

- Worked with top wallet teams – **Jupiter, Backpack, and MetaMask** on WalletConnect integration with Solana support
- Wrote documentation, guides, and sample apps, and supported wallet teams in integrating WalletConnect, partnered with product and engineering, and helped onboard more wallets to the WalletConnect Certified initiative.

### Huddle01

Apr. 2023 – Aug. 2024

#### DevRel Engineer

- Wrote docs, blogs, and sample apps and contributed to the SDKs, driving **200+ projects** built on Huddle01
- Built FarHouse, an audio-spaces client on Farcaster with in-app tipping, reaching **30K+ MAUs**, grew the Discord community from 2K to **13K+**

### Google Summer of Code '22

2022

#### Open-Source Contributor at Oppia Foundation

- Merged 30+ PRs improving accessibility in the Oppia Android app, an interactive educational platform

## PROJECTS

---

### Stackit – Theme-based investable basket of tokens

- Built a portfolio tool to invest in curated token baskets with fund analytics and a referral program (built during Solana Startup Village)
- **Won 2nd prize** at Solana Hacker House and received a **Superteam grant**

### Farview.id – Personalized profile pages for Farcaster & Base users

- Surfaced each user's Farcaster and on-chain activity; **6K+ users** and **12K+** Frame interactions
- **Won the Social track** at Base On-chain Summer Buildathon and received a **Base builder grant**

## SKILLS

---

**Languages:** TypeScript, JavaScript, Solidity, Python, Rust (familiar)

**Backend:** Node.js, PostgreSQL, Supabase, Firebase, Redis, AWS, Clickhouse

**Web3:** Solana, EVM, Ethers.js, Web3.js, solanakit, Wagmi/Viem, Dune

**DevRel & Solutions:** Technical docs, SDK integration support, sample apps & demos, client/customer support, developer community & conference speaking

## ACHIEVEMENTS

---

- Won **2nd prize** in the DeFi track of the Breakout Hackathon organized by **Colosseum** & selected for **Colosseum Accelerator Cohort 3 (YC for Solana)**
- **ETHGlobal Finalist** and winner of **30+ hackathons**, received builder grants from Base and Superteam
- Speaker at 25+ conferences and events, mentored in several web3 hackathons such as ETHIndia and HackFS
